Hi John,

I'll try to cover what we talked about in our phone call, but feel free to call if you have any more questions:

If a producer wishes to improve the drainage of farmground, ensure that there is a certified wetland determination on that ground to make sure that wetland compliance is followed. If there is not a certified determination on the farm, contact the local FSA office to fill out form AD-1026.

In a Farmed Wetland a producer may not do any activity that will improve the drainage of the area including installing new tile or improving the current drainage system. Replacing tile with the same width and at the same depth within the farmed wetland is allowed. If new tile is being installed on the farm outside of the farmed wetlands, contact the local NRCS field office to ensure that an adequate setback is in place to remain in compliance.

If a producer does not wish to farm the wetland areas, the ground may be eligible for a Conservation Reserve Program (CRP) Wetland Restoration. The farmed wetlands and other areas of the farm may be enrolled in the CRP program and receive yearly rental payments on these areas. This a 10 year program and enrolled acres will be planted to a wetland mix of native grasses and forbs.

I've also included a sheet that has the definition of each possible wetland determination and a link below that will go to Illinois state office contacts for HEL and Wetland determinations, though the Field offices should be able to answer most questions regarding compliance.

[Conservation Compliance | NRCS Illinois \(usda.gov\)](#)

*DEFINITIONS OF WETLAND LABELS

AW	<u>Artificial Wetland</u> : An area that was formerly a non-wetland area under natural conditions but now exhibits wetland characteristics because of the influence of human activities. These areas are exempt from the Food Security Act of 1985, as amended. This label includes irrigation induced wetlands.
CC	<u>Commenced Conversion</u> : A wetland, farmed wetland, farmed wetland pasture, or converted wetland on which the conversion began but was not completed before December 23, 1985, was approved by FSA to continue, and the conversion was completed by January 1, 1995.
CPD	<u>COE Permit with Mitigation</u> : A converted wetland authorized by a permit issued under Section 404 of the Clean Water Act. Production of agricultural commodities is allowed subject to conditions of the permit.
CMW	<u>Categorical Minimal Effect</u> : A wetland that meets specific categories of conversion activities that have been determined by NRCS to have minimal effect, individually and cumulatively, on the functions and values of the wetland and the wetlands in the watershed.
CW	<u>Converted Wetland</u> : A wetland converted between December 23, 1985, and November 28, 1990. Production of an agricultural commodity or additional manipulation of these areas will yield USDA benefit ineligibility. Also, these areas are wetlands converted after December 23, 1985, by a county, drainage district, or similar entity. For these instances, production of an agricultural commodity or forage for mechanical harvest or additional manipulation will cause ineligibility for USDA program benefits.
CW+year	<u>Converted Wetland + (year the conversion occurred)</u> : A wetland converted after November 28, 1990, where the USDA program participant is ineligible for benefits until the wetland is restored or mitigated unless an exemption applies.
CWNA	<u>Converted Wetland Non-Agricultural Use</u> : A wetland converted after November 28, 1990, to a use other than agricultural commodity production. Label not used for certified wetland determinations completed after 2/2008.
CWTE	<u>Converted Wetland Technical Error</u> : A wetland converted or commenced after December 23, 1985, based on an incorrect NRCS determination. This label does not apply to obvious wetlands as defined in the National Food Security Act Manual.
FW	<u>Farmed Wetland</u> : A wetland that was manipulated and planted before December 23, 1985, but still meets inundation or saturation criteria. These areas may be farmed and maintained as documented before December 23, 1985, as long as they are not abandoned (i.e., management or maintenance for commodity production ceased for 5 consecutive years).
FWP	<u>Farmed Wetland Pasture or Hayland</u> : A wetland that is used for pasture or haying, was manipulated and planted before December 23, 1985, but still meets the inundation or saturation criteria. These areas may be farmed and maintained as documented before December 23, 1985, as long as they are not abandoned (i.e., management or maintenance for commodity production ceased for 5 consecutive years).
MIW	<u>Mitigation Exemption</u> : A converted wetland, farmed wetland or farmed wetland pasture of which the acreage, functions and values lost have been compensated for through an NRCS-approved mitigation plan.
MW	<u>Minimal Effect Exemption</u> : A converted wetland that is exempt from the wetland conservation provisions of the Food Security Act of 1985, as amended, based on an NRCS determination that the conversion has or will have a minimal effect, individually and cumulatively, on the functions and values of the wetland and the wetlands in the watershed.
MWM	<u>Mitigation Site</u> : The site of wetland restoration, enhancement, or creation serving as mitigation for the mitigation exemption (MIW) site.
NI	<u>Not Inventoried</u> : An area where no wetland determination has been conducted. Label not used for certified wetland determinations completed after 2/2008.
NW	<u>Non-Wetland</u> : An area that does not contain a wetland. Also includes wetlands converted before December 23, 1985, but a commodity crop was not produced and the area does not meet wetland criteria (not been abandoned).
PC	<u>Prior-Converted Cropland</u> : A wetland converted to cropland before December 23, 1985, and as of December 23, 1985, was capable of being cropped and did not meet farmed wetland hydrology criteria. These areas are not subject to the wetland conservation provisions of the Food Security Act of 1985, as amended, unless further drainage manipulation affects adjacent wetlands.
PC/NW	<u>Prior Converted Cropland/Non-Wetland</u> : An area that contains both PC and NW.
TP	<u>Third-Party Exemption</u> : A wetland converted after December 23, 1985, by a third party who is not associated with the participant, and the conversion is not a result of a scheme or device. A third party does not include predecessors in interest on the tract, drainage districts, or other local government entities.
W	<u>Wetland</u> : An area meeting wetland criteria that was not converted after December 23, 1985. These areas include farmed wetlands and farmed wetland pasture that have been abandoned.
WX	<u>Manipulated Wetlands</u> : A wetland manipulated after December 23, 1985, but the manipulation was not for the purpose of making production possible and production was not made possible. These areas include wetlands manipulated by drainage maintenance agreements.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD). To file a complaint of discrimination, write USDA, Assistant Secretary for Civil Rights, 1400 Independence Avenue, S.W., Stop 9410, Washington, DC 20250-9410, or call toll-free at (866) 632-9992 (English) or (800) 877-8339 (TDD) or (866) 377-8642 (English Federal-relay) or (800) 845-6136 (Spanish Federal-relay). USDA is an equal opportunity provider and employer.

Farm Service Agency

Conservation Reserve Program – Continuous Enrollment Period

FACT SHEET

May 2022

Overview

The U.S. Department of Agriculture (USDA) is accepting offers for specific conservation practices under the Conservation Reserve Program Continuous Signup.

The USDA Farm Service Agency's (FSA) CRP is a voluntary program that contracts with agricultural producers so that environmentally sensitive agricultural land is devoted to conservation benefits. CRP participants establish long-term, resource-conserving vegetative species, such as approved grasses or trees (known as "covers"), to control soil erosion, improve the water quality and enhance wildlife habitat. In return, FSA provides participants with annual rental payments and cost-share assistance. Continuous signup enrollment contracts are 10 to 15 years in duration.

The Food Security Act of 1985, as amended, authorized CRP. The program is also governed by regulations published in 7 CFR, part 1410. The program is implemented by FSA on behalf of USDA's Commodity Credit Corporation. To offer land for continuous enrollment, producers should contact their local FSA office.

Benefits

CRP protects millions of acres of American topsoil from erosion and is designed to safeguard the nation's natural resources. By reducing water runoff and sedimentation, CRP protects groundwater and helps improve the condition of lakes, rivers, ponds and streams. The vegetative covers also make CRP a major contributor to increased wildlife populations in many parts of the country.

Administration

FSA administers CRP while technical support functions are provided by:

- USDA's Natural Resources Conservation Service (NRCS);
- State forestry agencies;
- Local soil and water conservation districts; and
- Other non-federal providers of technical assistance

Continuous Enrollment

Under continuous CRP signup, environmentally sensitive land devoted to certain conservation practices can be enrolled in CRP at any time. Offers are automatically accepted provided the land and producer meet certain eligibility requirements and the enrollment levels do not exceed the statutory cap. Unlike CRP enrollments under general CRP signups or CRP Grasslands, offers for continuous enrollment are not subject to competitive bidding during specific periods.

If the offered acres are currently enrolled in CRP under a CRP contract that expires September 30, then the effective start date of the new CRP contract must be the following October 1.

If the offered acres are not currently enrolled in CRP, then the producer may choose to defer the effective start date of the new CRP contract for up to six months after the offer is approved.

Who is Eligible?

A producer must have owned or operated the land for at least 12 months prior to submitting the offer, unless:

- The new owner acquired the land due to the previous owner's death;
- The ownership change occurred due to foreclosure where the owner exercised a timely right of redemption in accordance with state law; or
- The circumstances of the acquisition present adequate assurance to FSA that the new owner did not acquire the land for the purpose of placing it in CRP.

CRP – CONTINUOUS ENROLLMENT PERIOD - MAY 2022

Eligible Land

Land must be cropland that is planted or considered planted to an agricultural commodity four of the six crop years from 2012 to 2017 and is physically and legally capable of being planted (no planting restrictions due to an easement or other legally binding instrument) in a normal manner to an agricultural commodity. Certain marginal pastureland that may be devoted to riparian buffers, wildlife habitat buffers, or wetland buffers is also eligible.

Eligible Practices

Land must be eligible and suitable for any of the following conservation practices:

- Grass Waterway
- Shallow Water Area for Wildlife
- Contour Grass Strip
- Filter Strip
- Riparian Buffer
- Denitrifying Bioreactor on Filter Strip and Riparian Buffer
- Saturated Filter Strip and Riparian Buffer
- Habitat Buffers for Upland Birds
- Wetland & Buffer SAFE Practices
- Wetland Restoration on Floodplain and Non- floodplain
- Prairie Strips
- Windbreaks, Shelterbelts and Living Snow Fences
- Marginal Pastureland Wetland Buffer and Wildlife Habitat Buffers
- Long Leaf Pine Establishment
- Duck Nesting Habitat
- Pollinator Habitat
- Bottomland Timber Establishment on Wetlands
- Farmable Wetlands Program (FWP) Constructed Wetland
- FWP Aquaculture Wetland Restoration
- FWP Flooded Prairie Wetland
- Farmable Wetlands and Farmable Wetland Buffer
- Wellhead Protection Area Practices
- State Acres for Wildlife Enhancement (SAFE)
- Highly Erodible Land Initiative (HELI)

Payments

Under CRP continuous signup, FSA provides eligible participants with annual rental payments and cost-share assistance.

A Signup Incentive Payment of 32.5 percent of the first full year annual rental payment is paid at contract approval on all newly enrolled Continuous CRP contract acreage. A Practice Incentive Payment of up to 50 percent is paid for installing the practice.

Annual Rental Payments

- In return for establishing long-term, resource-conserving covers, FSA provides annual rental payments at 90 percent of the existing rate to eligible CRP continuous participants based on per acre cropland and marginal pasture land rental rates, plus a 10 percent “inflationary” adjustment, determined by FSA.
- The per-acre annual rental rate may not exceed the calculated rate or \$300/acre. Producers may elect to receive a rental rate amount less than the maximum payment rate.
- **Climate-Smart Practice Incentive:** FSA provides an incentive of 3, 5, or 10 percent for CRP practices that will increase carbon sequestration, reduce GHG emissions, and otherwise are climate smart practices. The incentive amount is based on the estimated benefits of each practice.
- **Water Quality Incentive:** FSA provides a 20 percent rental rate incentive for CRP water quality practices that will improve water quality by reducing sediment loading, nutrient loading and harmful algae blooms.

Cost-Share Assistance

Cost-share of up to 50 percent of the re- reimbursable cost of installing the practice is provided by FSA. Cost-share assistance is not available for any management activity.

More Information

For more information about FSA and its programs, visit www.fsa.usda.gov or contact your local FSA office. To find your local FSA office, visit:
