

In July of 2025, 80 soil samples were taken on the subject farm (see map on page 2). A 16 page report was prepared that showed both current levels of nutrients and recommendations for the next four years (see below). Since the reports would be useful to the new owner (or their tenant) the 2025 tenant is to be reimbursed a total of \$1,833.35 for this information.
